If you want the solid educational background that makes this a reality, then our Master's Programme (One Year) in Informatics – Data-Driven IT Management is the programme for you. In this programme, you will develop knowledge to shape the future of IT.

Informatics – Data-Driven IT Management

MASTER'S PROGRAMME

In this Master's programme (One Year) in Informatics, you will develop knowledge to shape the future of IT.

This programme targets motivated students with an Bachelor's degree in computer science, information systems, information technology, software engineering, or a similar subject with at least 60 credits in Informatics.
OUR PROGRAMME IN SHORT
This programme is focused on Data-Driven IT Management, the driving force for the IT of the future. Data-Driven IT Management aims at harvesting the business value of the enormous amount of largely unused data available to companies.

To prepare you for this exciting opportunity, the programme provides courses in Data Mining, Business Intelligence, Business Process Management, Current Trends in Informatics, and Data-Driven Service Development.

CAREER OPPORTUNITIES
Experts in Data-Driven IT Management are in high demand and the number of available experts is still very low. This programme therefore provides excellent opportunities to get access to top-level jobs such as IT consultant, Head of IT, IT Project Manager, Business Analyst, System Developer, Data Analyst, Data Scientist and so on.
