

Dear new student!

It is my pleasure to welcome you here for your two years studies at the International Master of Science program; Resource Recovery! And you are most welcome to Borås, a wonderful city in the west of Sweden. Borås was awarded 2020 years Student city in Sweden and in September this year we will have the 4<sup>th</sup> addition of the Street Art Festival; No Limit, decorating the walls in the city centre. In 2021 Borås celebrates its four hundred birthday, meaning a lot of activities and in the winter Borås hosts the Swedish Championship in winter sports. Borås has its own idea page for students to find different activities; <https://www.boras.com/en/>, With tips and ideas on what to do or where to go. The school provides help and support in many areas such as search, language support, study planning or work shops; <https://www.hb.se/en/Current-Student/Support/>. The semester will start as planned if nothing unpredicted happens with Covid-19. And to help students that might be delayed because of the current situation it will be possible to follow the start of the courses both at campus and at distance.

Best wishes

Anita
